

Sunbird hardware bag contains 7 clevises, 4 pushrods and 3 couplers, the followings is how to use them when assembly:

please bent four threaded rods to "Z" shape, then screw them to four clevises and use them to connect the four servos on the wings.

- please use two couplers and connect to the snakes and two clevises to the two servos in the fuselage, the rest coupler and clevis will be used on the rudder horn.
